## EXPERIENCE

---

### **Wochit**, *Lead Front-end Developer*

Jan '19 - Current

- Architected, designed, and develop a video creator website for Chrome browser using Vuejs.
- Reduce server-side graphics engine by transpile server graphics engine to javascript and HTML canvas and running it on the client-side.
- Upgrade the site from RequireJS to Webpack. This upgrade, Speed up the first frame, improve development experience, and managed a clean code.
- Adding unit testing and apply them as part of the CICD.
- Creating a mono repo (using Lerna) and NPM registry to distributed common packages to multi Wochit applications.

### **AT&T**, *Lead Front-end Developer*

Aug '16 - Jan '19

- Architected, designed, and developed a live and VOD streaming application for Chrome and Safari browser using Angular 2+ ([live site](#)).
- Leading and managing the Chrome-Cast AT&T app using ES6, Webpack and NodeJS.
- Found and fixed memory leaks using Chrome Developer tools.
- All applications were running unit, integration and e2e tests using Karma, Jasmine and Protractor.
- Won an AT&T Hackathon for creating a p.i.p. video ( a chrome application extension that was making the video element as a separate window).
- Creating a NodeJS CLI for creating and distrusted NPM packages using NodeJS and NPM.

- Working in an Agile Scrum environment.
- During my time in AT&T I promoted to Senior Developer.

**MTS**, *Front-end Developer*

May '15 - Aug '16

- Architected, designed, and developed a portal for displaying reports as a graph using Highlight.js and AngularJS ([video demo](#))
